

Adarsh Sarda

AI SECURITY RESEARCHER / M.SC. CANDIDATE

Amberg, Germany | +49 1551 0438756
adarshsarda29@gmail.com | adarshsarda.github.io
linkedin.com/in/adarshsarda | github.com/adarshsarda

DETAILS

LOCATION

Amberg, Germany

BORN

29 May 2000, India

AVAILABILITY

Werkstudent, 20 hours/week,
immediate start

TECHNICAL SKILLS

- Python
- PyTorch
- scikit-learn
- Vertex AI (GCP)
- NLP and LLMs
- Adversarial ML
- Explainable AI
- Threat modelling
- LLM red teaming
- Prompt engineering

LANGUAGES

English C1
German B1
Hindi, native

INTERESTS

Music: voice, synthesizer, ukulele,
guitar

Cooking: Asian cuisine, especially
Indian

PROFILE

M.Sc. Artificial Intelligence student at OTH Amberg-Weiden focused on AI security, LLM red teaming, adversarial machine learning, and rigorous evaluation of modern AI systems.

EXPERIENCE

Research Analyst

01/2023 - 10/2024

GreyB Research, Chandigarh, India

- Built an ML system for automated patent technology classification over large patent corpora.
- Conducted infringement, prior-art, and technology-scouting analysis across AI/ML, blockchain, 3GPP, and IETF technologies for international clients.

EDUCATION

M.Sc. Artificial Intelligence for Industrial Applications

03/2025 - present

OTH Amberg-Weiden, Bavaria | Grade 2.0

B.Tech in Information Technology

08/2019 - 06/2023

Institute of Engineering and Management, Kolkata | Grade 1.7 (8.6/10)

SELECTED WORK

Order-dependent semantic backdoor for multi-turn LLMs

Qwen2.5-3B, LoRA, pre-registered evaluation

- Achieved 100% in-distribution attack success (n=140), 0% false-trigger rate, and 0.887 attack success on held-out paraphrases.

Red Teaming AI Systems: A Practitioner's Guide

Portfolio knowledge base, 2026

- Authored a six-phase methodology for testing chatbots, RAG pipelines, and agents, mapped to NIST AI RMF, OWASP, and MITRE ATLAS.

Where the Devil Hides

AI Conference paper presentation, 2026

- Presented a CVPR 2025 study on passcode-controlled training-data backdoors in deepfake detectors.

Multimodal emotion recognition

Springer book chapter, 2023

- Built a model with approximately 86% accuracy and co-authored a Springer publication in 2023.
